

Venue	University of Pisa - Pisa (PI) - Italy Attendance - In presence
Keynoters	Prof. Dino Pedreschi - University of Pisa Prof. Bart Verheij - University of Groningen Prof. James Brusseau - Pace University NY, University of Trento Prof. Giuseppe Contissa - University of Bologna, European University Institute
Call for Abstracts	We invite and welcome submissions of original, unpublished abstracts that explore the domain of Law, AI and Society. Abstracts should clearly state the research question, methodology, and key findings or expected contributions. To submit an abstract , please see the instructions on our website: https://lsai-ws.github.io . The i-lex – Journal of Law, Cognitive Science and Artificial Intelligence (https://i-lex.unibo.it/) welcomes the submission of papers developed from the abstracts shared, discussed and presented at the Doctoral Workshop.
Important Dates	Deadline for Submission - 30 September 2024 Acceptance notification - 31 October 2024 Workshop (University of Pisa) - 2 December 2024

The **1st Doctoral Workshop on Law, Society and Artificial Intelligence** invites PhD candidates to explore the intersection of Artificial Intelligence (AI), Law and Society. The workshop explores the growing impact of Artificial Intelligence on society from a **legal, technical and ethical** standpoint, underlying the existing relationship between the technical and social aspects of AI research and deployment, as it aims to foster a multidisciplinary discussion on the implications of AI for society and the law. Legal scholars grapple with the ethical and juridical implications of increasingly autonomous AI systems, particularly concerning decision-making processes and potential biases within algorithms, within a rapidly evolving field of research. Legal frameworks are being reevaluated to address issues of liability and accountability in a world where AI plays an ever-more prominent role, facing issues in human-computer interaction, accountability, explainability and ethics.

We invite and welcome submissions of original, unpublished **abstracts** that explore the domain of Law, AI and Society. A series of **suggested research themes** of research are present to foster a varied and multifaceted discussion:

- *Ethical, legal, and social issues in human-computer interaction.*
- *Automation and accountability in AI-based decision-making.*
- *Civil and criminal liability for AI-based systems.*
- *Explainable, interpretable, and transparent AI.*
- *Impact of general-purpose AI models.*
- *Legal and ethical frameworks for AI governance.*
- *The development and deployment of AI in the legal domain.*
- *AI for Democracy and Legislative Action.*
- *AI, User Experience (UX) and User Interface (UI) design.*

For any questions, we encourage you to contact us at aillawandsociety2024@outlook.it.
